

Service delivery options

Our Aged Care Programs include four service delivery options for aged people

Support at Home

Providing client directed comprehensive support and assistance to continue living independently in their own home.

Commonwealth Home Support Program

Providing assistance with daily tasks for people to live independently in their own home.

Services include:

- Personal care
- Social support
- Domestic assistance
- Garden maintenance
- Transport
- In-home meal preparation
- Shopping
- Allied health

Community Transport Program

Helping clients maintain their independence by providing access to their community for social and recreational activities including shopping, access to various medical and specialists' services, essential services, or access to work.

Local assistance with specialised one-off cleaning services

Nhulundu Health Service can assist our aged community with managing situations of hoarding through de-cluttering support and specialized cleaning. To determine eligibility call My Aged Care on 1800 400 422

For further information or assistance contact Nhulundu Health Service Aged Care on **1800 468 000**.

Yard Maintenance

Take the hard work out of
yard work for Aged Care clients

NHULUNDU
HEALTH SERVICE

Gladstone Region Aboriginal and Islander Community Controlled Health
Service Ltd

How can we help?

Nhulundu Health Service has been delivering cost-effective services to Aged Care clients in the Fitzroy Region for over 20 years. Our professionally accredited team can assist our aged community to live independently in their own home.

We can provide services ranging from domestic support to transport and yard maintenance. Assistance is also available for our aged community who are experiencing difficulties accessing secure and affordable housing, require additional support to access suitable services or navigate the Aged Care system.

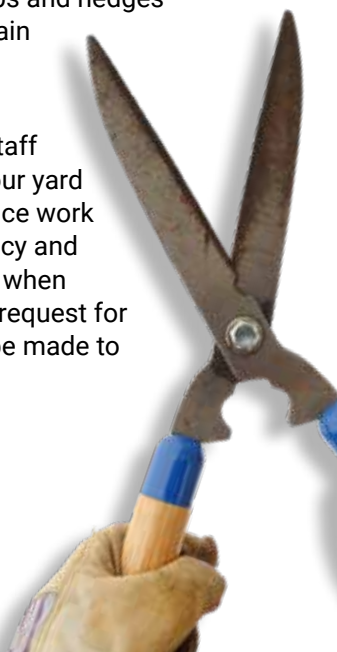

What is this service?

Nhulundu Health Service can help ensure your yard is kept clean and tidy and free of debris. Our trained Yard Maintenance staff can assist eligible* Aged Care clients with lawn mowing and whipper-snipping to ensure your yard is tidy and well maintained.

The trimming of small shrubs and hedges can be approved under certain circumstances, in line with funding guidelines.

Let our Yard Maintenance staff take the hard work out of your yard work. All garden maintenance work is quoted prior, with frequency and tasks agreed upon with you when signing up for support. Any request for additional services should be made to the Aged Care Manager.

* Approved Aged Care clients may utilise funding from either their Support at Home or Commonwealth Home Support Program for yard maintenance services.

Let our Garden Maintenance staff

Take the hard work out of yard work

How much does it cost?

The Australian Government subsidises a range of services, however you may be asked to make a contribution based on your financial circumstances.

Your individual funding package will determine how much you will need to pay. Fees and eligibility for subsidy will be discussed with you before the relevant service commences.

All yard maintenance work will be quoted prior to the service being established. This allows you to decide exactly what services you require and how frequently you need them.

For more information about costs visit the My Aged Care website: www.myagedcare.gov.au.

How can I find out more information?

Phone the Aged Care Program on 1800 468 000 or visit our website www.nhulundu.com.au.

Once you have contacted us we will arrange a meeting to assess your individual needs and discuss the support we can provide.
